# What is Make.com?

- Make.com (formerly Integromat) is a **visual automation platform**.
- It lets you connect apps like Gmail, Sheets, and AI tools — *without coding*.
- You can build workflows that trigger automatically based on events.

## Example Scenario

**Goal:** Automatically create video by giving input text in excel sheet

### Apps Used:

- Google Sheets – to log topic, and the detailed description. (We can also update the sheet with the prompt and video link.)
- Google Vertex AI – to generate prompt and video.
- Youtube – To upload the video.
- Make.com – to connect everything seamlessly.

A screenshot of the Google AI Studio API Keys page. The URL in the address bar is `aistudio.google.com/api-keys`. A success message box at the top center says "Projects imported successfully!". On the left sidebar, under the "API keys" section, there is a redacted API key value. The main table lists four API keys:

Key	Project	Created on	Quota tier
[Redacted]	Make test make-test-478011	Nov 12, 2025	Tier 1
[Redacted]	Gemini API gen-lang-client-0360239424	Nov 10, 2025	Tier 1
[Redacted]	Gemini API gen-lang-client-0360239424	Oct 29, 2025	Tier 1
[Redacted]	Gemini API gen-lang-client-0360239424	Jun 28, 2025	Tier 1

An arrow points from the "Copy API key" button next to the third row to the "Copy API key" button in the tooltip. The tooltip also contains the text "Copy API key". The "Import projects" button is located at the bottom right of the page.

Text Content:

Create only the prompt for creating a social media video about the topic '1. Detailed explanation (B)' using veo. Act as a raw data generator. Output ONLY the visual description paragraph for the video. Do not include headlines, labels like 'Video Description:', bullet points, explanations, or intro/outro text. Do not use bold formatting. Just provide the raw string describing the visual.

**Workflow Overview:**

```
graph LR; A((Google Sheets)) --> B(( )); B --> C(( )); C --> D((Google Vertex AI)); D --> E(( )); E --> F((YouTube)); F --> G(( )); G --> H((Google Sheets));
```

**YouTube Configuration (Main Panel):**

**Privacy Status and Scheduling \*** (Public selected)

Determines video visibility. If you want to upload a video but schedule its publishing for later, set this to **Private** and you'll get the option to set a date to publish it.

**Description**

This is a video generated video made with the help of automation using Make.com. I have given the topic "**1. Topic (A)**" and detailed explanation "**1. Detailed explanation (B)**" in the excel sheet. The prompt for the video is also generated using Gemini. And the prompt for this video is "**2. Text Response**". Let me know in comments if you want to know how to create this workflow.

If the description contains < or >, you must delete those specific characters. All other characters are accepted.

⚠ Must be at most 5000 characters long.

**The video is made for kids** (No selected)

If the video is made for kids, regardless of your location, you're legally required to comply with the Children's Online Privacy Protection Act (COPPA) and/or other laws.

**The video contains altered/synthetic media** (Off)

# Limitations of MAKE

- Execution Frequency

On the Free plan, scenarios can run **every 15 minutes** (not real-time). Paid plans can go as low as **1 minute** intervals.

- Operation Limits

Each step in a scenario = 1 operation. Free plan gives **1,000 ops/month**; higher plans go up to millions.

- Data Retention

Execution logs and data bundles are kept for **7 days (Free)** or up to **90 days (Pro/Enterprise)**.

- Execution Time

Each scenario run can last **max 40 minutes** (Free/Basic) — longer ones are automatically stopped

- Parallel Executions

Limited number of concurrent scenario runs depending on your plan tier.(how many scenario instances can run at the same time.)

Thank you
